STAIRLIFTS

IF YOU OR A LOVED ONE is having difficulty getting up and down the stairs or at risk of falling, a StairLift is the ideal solution to ensure safety and independence within your home.

From straight to custom curved, we offer a wide selection of best-in-class, professionally installed StairLift solutions to provide safe travel up and down the stairs, indoors and out.

STRAIGHT STAIRLIFTS

For a single flight of stairs that runs in a straight line without any interruptions or turns.

Custom-built to fit your staircase. Curved StairLift are designed for staircases that have turns or bends.

CUSTOM CURVED STAIRLIFTS

Weather-proofed outdoor StairLift, available for both straight and curved applications.

OUTDOOR STAIRLIFTS

- ▲ StairLifts mount directly to the stair treads, not to the wall, leaving your walls intact.
- ▲ Suitable for all types of staircases, with railings and wall on one or both sides
- ▲ Extra slim models available for staircase width as narrow as 26"
- ▲ Seat, armrests, and footrest fold away to maximize usable staircase space when StairLift not in use.
- ▲ Battery-powered for continued use during an outage.

PLATFORM LIFTS

WE OFFER VERTICAL PLATFORM LIFTS (VPLs) which can be installed indoors or outdoors, and **INCLINED PLATFORM LIFTS** (IPLs) which are similar to StairLifts with a platform able to carry a wheelchair.

VPLs travel up and down vertically like an elevator, while IPLs run along the incline of an existing staircase. Both can accommodate most mobility devices, for an easy and seamless transfer.

VERTICAL PLATFORM LIFTS

Provide wheelchair access to raised porches, decks, and other elevated areas.

Provide transportation for wheelchair-bound users along the incline of an existing staircase.

STRAIGHT INCLINE PLATFORM LIFTS

CURVE INCLINE PLATFORM LIFTS

Can be custom fitted for a curved staircase, indoor or outdoor

- ▲ VPLs are available with a range of features and options to suit the layout of the area where the lift will be used.
- ▲ VPLs are available in lifting heights from a few inches to 14 feet.
- ▲ IPLs are available with different sized platforms, to suit your mobility device. When not in use, the platform can be easily folded against the wall to allow easy access to the stairs.

BATH SAFETY

WITH ITS SHARP CORNERS and slippery surfaces, the bathroom can be the most dangerous room in the house. Our bathroom safety solutions help prevent falls and ensure independence and safety.

Our transfer system will turn your existing bathroom into an accessible bathroom that allows you to enjoy bathing or showering again without the cost and complication of a full bathroom remodeling.

BATH TRANSFER

Rolling bath transfer system eliminates the need for costly bathroom remodeling.

Rolling shower transfer system is comfortable for both user and caregiver.

SHOWER TRANSFER

SAFETY BARS

Professionally installed safety bars can help prevent falls

- ▲ Bath transfer system alleviates need for heavy lifting and multiple transfers for bathing and showering.
- ▲ Rolling base rolls around house like a wheelchair minimizing transfers.
- ▲ Doubles as a commode that fits over most toilets.
- ▲ Height can be adjusted to allow for use in a variety of tubs.
